6+ Years in iOS · **50+** Engineers led · **1M+** Users reached · **90%** Test coverage

SUMMARY

Senior iOS engineer and mobile architect with over six years in regulated fintech and high-traffic consumer products serving millions of users. Shipped production UIKit at Bank of Georgia (1M+ users) and Adjarabet (500K monthly users) before leading a full SwiftUI and Swift 6 migration across eight product teams with zero production regressions. Owns iOS architecture for eight product teams at TBC Group's fintech arm: design system, testing strategy and CI/CD. Biased toward platform work that measurably speeds other engineers up, and toward measuring whether it did.

EXPERIENCE

Senior iOS Architect · [Space International \(TBC UZ\)](#)

Mar 2023 - Present

Tbilisi, Georgia

- Own iOS architecture across 8 product teams and 50+ engineers: framework and library choices, module boundaries, quality standards and the release process
- Architected an enterprise design system in SwiftUI adopted by ~100 developers across 3 companies, with VoiceOver, Dynamic Type and WCAG compliance and snapshot tests guarding every component against visual regression
- Led the migration to SwiftUI and Swift 6 structured concurrency module by module while 8 teams shipped in parallel: 100% adoption, zero production regressions
- Established the testing pyramid of unit, UI, snapshot and contract tests and enforced 90%+ coverage through a CI quality gate with SwiftLint rules and coverage thresholds
- Built CI/CD on Bitrise and Fastlane with automated builds, tests and App Store deployment, cutting the release cycle from 2 weeks to 3 days
- Coach engineers through architecture workshops, 1-on-1 mentoring and code review, and authored the iOS onboarding documentation

Swift 6 · SwiftUI · UIKit · Combine · MVI · Clean Architecture · Bitrise · Fastlane · SPM

iOS Developer · [Adjarabet](#)

Jul 2021 - Apr 2023

Tbilisi, Georgia

- Built the iOS application from scratch to App Store launch in UIKit with MVVM and Combine, delivering a gaming platform to 500K+ monthly active users
- Delivered custom CoreAnimation transitions and rich UIKit interfaces across the product, with CoreData powering offline access
- Integrated 5+ third-party vendor SDKs (slot games, sportsbook, payment providers) behind custom abstraction layers, isolating a volatile dependency graph from product code
- Built an XCUITest automation suite over the critical user flows with QA, reducing manual testing effort by 30%
- Conducted 200+ code reviews, mentored junior developers and shaped the team's engineering standards and documentation

Swift · UIKit · SwiftUI · CoreData · CoreAnimation · MVVM · XCUITest

iOS Developer · [Bank of Georgia](#)

Oct 2020 - Jul 2021

Tbilisi, Georgia

- Shipped features in the flagship mobile banking app serving 1M+ users, in UIKit with MVP architecture
- Implemented secure financial transaction flows with biometric authentication (Face ID, Touch ID) and encryption
- Turned requirements into technical specifications with product managers, designers and backend engineers in an Agile/Scrum environment
- Scoped the iOS side of the core banking platform redesign in a cross-team discovery phase spanning 4 Scrum teams

Swift · UIKit · MVP · Face ID · Touch ID · Agile

Junior Analyst Developer · Bank of Georgia

Mar 2020 - Oct 2020

Tbilisi, Georgia

- Developed internal HR Management System handling employee data, payroll, and reporting workflows
- Transitioned to iOS team after demonstrating strong programming fundamentals and mobile development aptitude

Internal Tools · HR Systems

SKILLS

Languages: Swift, C, C++, Python, Go

UI: UIKit, SwiftUI, CoreAnimation, Auto Layout, Design systems, Accessibility (VoiceOver, Dynamic Type, WCAG)

Architecture: MVVM, MVP, MVI, Clean Architecture, Modular architecture (SPM), Dependency injection, Protocol-oriented programming, Mobile system design

Concurrency: Swift concurrency (async/await, actors, Sendable), Combine, GCD

Testing: XCTest, XCUITest, Snapshot testing, Contract testing, TDD

Platform: CoreData, StoreKit, AVFoundation, MapKit, Instruments

CI/CD: Bitrise, Fastlane, SwiftLint, TestFlight, App Store Connect, SPM, CocoaPods

EDUCATION

B. Sc. Computer Science & Mathematics · Free University of Tbilisi

2017 - 2021

GPA: 3.5 / 4.0

Coursework: Raft consensus for a distributed key-value store (Go), Stanford Pintos operating system (C), Concurrent multithreaded banking system (C), Nand2Tetris

Full scholarship recipient with top national exam scores.

AWARDS

ACM-ICPC Northern Eurasia Finals · ICPC

2020

Competitive programming finalist representing Georgia on the international stage.

Gold Medal — International Young Naturalists Tournament · IYNT

2015

1st place at the International Young Naturalists Tournament in Belgrade, Serbia.

TEACHING

Instructor · Algorithms & Data Structures · Mziuri School of Technologies

2020 - 2023

Taught 50+ students C++ programming, algorithm design, and competitive programming techniques.

LANGUAGES

Georgian (Native) · **English** (C1) · **Russian** (Basic)
